

BACKGROUND, INSTRUCTIONS, AND LIMITATIONS

The below instructions have been created by Novartis to assist with setting up COSENTYX as a favorite, as well as setting up a custom medication, in the Epic electronic health record (EHR) system. These instructions will not work for other conditions, treatments, or therapeutic areas, or on other EHR systems.

EHRs offer thousands of available medications at the provider's fingertips—making the process to find the appropriate medication time consuming. Beyond selecting the medication, additional prescription details, such as the medication dosing, routing, frequency, etc, need to be completed, often duplicating previously entered information.

Setting up a medication as a favorite eliminates a repetitive process and allows a seamless e-Prescription process, without sacrificing clinical quality and patient safety. In rare cases, the medication may have to be added as a custom medication if not available. A custom medication lacks important safety precautions information such as drug-drug interactions, drug allergy checks, and adverse events information.

Epic

Favorite Medication:

1. Open the **medication order** screen
2. Type the name **COSENTYX**
3. Select **COSENTYX** and complete the desired medication details
4. Click **Accept**
5. Click the **star icon** in the summary sentence to save **COSENTYX** as a favorite

Custom Medication:

1. Log in to the **Medication Master File (ERX)** with authorized user credentials (or access the **System Administration** menu)
2. Select **Add ERX Medication Record** and click **OK**
3. Complete the desired medication details for **COSENTYX**
4. Save the record, and release the record to production after testing has been completed to satisfaction

Note: To remove the custom medication, log in to the **Medication Master File (ERX)** and select the desired medication. Select **Delete ERX Medication Record** and click **OK**. Save the record to complete the removal of the custom medication.

NOTES

- The customers (ie, physician, medical group, and integrated delivery network [IDN]) shall be solely responsible for implementation, testing, and monitoring of the instructions to ensure proper orientation in each customer's EHR system
- Capabilities, functionality, and setup (customization) for each individual EHR system vary. Novartis shall not be responsible for revising the implementation instructions it provides to any customer in the event that the customer modifies or changes its software, or the configuration of its EHR system, after such time as the implementation instructions have been initially provided by Novartis
- While Novartis tests its implementation instructions on multiple EHR systems, the instructions are not guaranteed to work for all available EHR systems, and Novartis shall have no liability therefor
- The instructions have not been designed to be and are not tools and/or solutions for meeting Meaningful Use, Advancing Care Information, and/or any other quality/accreditation requirement
- All trademarks are trademarks of their respective holders, all rights reserved. Reference to products is not intended to imply affiliation with or sponsorship of Novartis and/or its affiliates
